

CDR® Vehicle List

CDR Software 25.3

Important Information about Vehicle Coverage

The Bosch Crash Data Retrieval Software and Hardware products support the retrieval of crash data from vehicles listed below.

Many vehicles listed in this document include coverage notes which may indicate limitations in CDR product coverage. Make sure that you read the coverage notes included below. For more detailed coverage information and/or limitations, refer to the CDR software help file.

Bosch takes all reasonable actions to ensure the CDR product supports all vehicles in the markets specified in this and other CDR product documentation. However, there may be some vehicles listed that the CDR system is unable to retrieve EDR data from. This may be caused by (but not limited to) information that was not available to Bosch at the time the product was developed or, EDR retrieval may be available only on vehicles with particular options.

Acronyms: ACM: Airbag Control Module, ADS: Advanced Driver System, ASCM: Active Safety Control Module, DCM: Driver Camera Module, FCM: Forward Camera Module, OCS: Occupant Classification System Module, PCM: Powertrain Control Module, PPM: Pedestrian Protection Module, ROS: Rollover Sensor, UDR: Universal Data Retrieval
